

# PrivacyAbroad Dedicated VPN on Windows 10

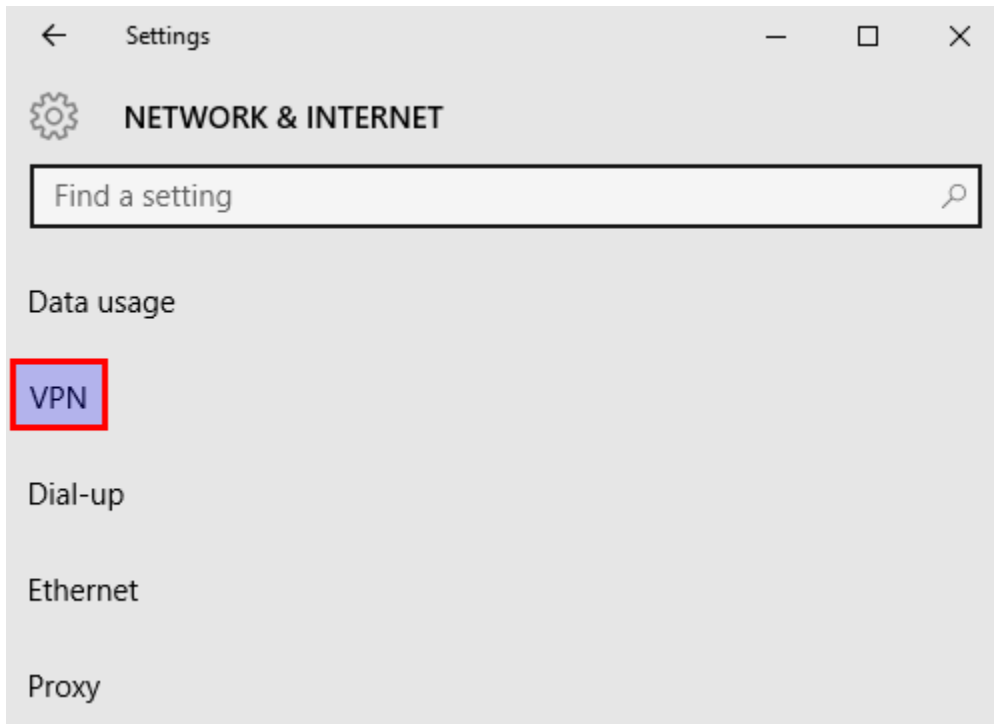

## 1. Launch the Start Menu and enter 'Settings'

## 2. Choose 'Network & Internet'

### 3. Choose 'VPN'

#### 4. Create New VPN connection

5. Fill in all required fields with values identical to those you see below (Username and password are your PrivacyAbroad account details)

The image shows a dark-themed dialog box with a vertical scrollbar on the right side. It contains the following elements:

- Type of sign-in info:** A dropdown menu with the text "User name and password" and a downward arrow.
- User name (optional):** A text input field containing the text "PrivacyAbroad login".
- Password (optional):** A password input field represented by a series of black dots.
- Remember my sign-in info:** A checked checkbox with a white checkmark.
- Buttons:** Two buttons at the bottom right labeled "Save" and "Cancel".

6. Choose newly created connection and click 'Connect'

Congratulations! You are now running PrivacyAbroad's Dedicated VPN on your Windows 10 computer. No PrivacyAbroad account? [Sign up here!](#)
